Review : correlation / variance

- Correlation expresses the strength of relationship between two variables

1034

Psychology 402 - Spring 2015 - Dr. Michael Dohr

Correlations

1035

Psychology 402 - Spring 2015 - Dr. Michael Dohr

Residuals in Linear Regression

Residual is difference between actual Y and predicted Y' ($Y - Y'$)

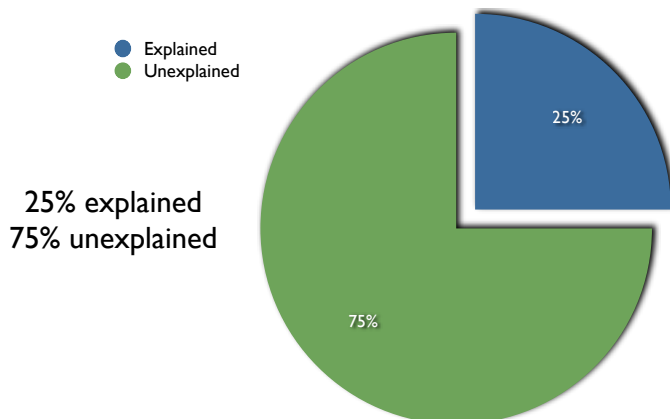

Graphically it is equal to how far away (vertically) a point is from the linear regression line

1036

Psychology 402 - Spring 2015 - Dr. Michael Dohr

Variance Pie Chart

1037

Psychology 402 - Spring 2015 - Dr. Michael Dohr

IQ testing

- IQ tests
 - Reliable? Yes. (Rs of 0.90+)
 - Valid? Answer depends on context
- To determine validity
 - What is the Construct?
 - What are the Criterion(s)?

1038

Psychology 402 - Spring 2015 - Dr. Michael Dohr

Race vs. DNA

- Ethnicity is a sociocultural construct
- Race is hard to define biologically
- DNA variation among humans exists, but
 - is about 0.1% (e.g. humans are 99.9% similar genetically)
 - 85% of variance is *within* racial groups
 - 15% between

1039

Psychology 402 - Spring 2015 - Dr. Michael Daele

IQ testing

- Binet -- developed IQ test to identify low-functioning children to help.
- Assumptions:
 - Ranking or Normal / High functioning pupils?
 - Hereditary (Genetic?)
 - Mutable?

1040

Psychology 402 - Spring 2015 - Dr. Michael Daele

Stanford-Binet Test

- Louis Terman (American) developed Binet's test at Stanford.
- Applied a *hereditarian* framework
 - assumes IQ is
 - genetic
 - immutable
 - ranking

1041

Psychology 402 - Spring 2015 - Dr. Michael Daele

The Bell Curve (1994)

- Herrnstein & Murray -- as criticized by Gould
- Intelligence can be quantified as a single number
- IQ can rank people (or groups) in linear order
- Intelligence is genetic
- Intelligence is immutable

1042

Psychology 402 - Spring 2015 - Dr. Michael Daele

Intelligence : Single Number

- Pro:
 - common "g" factor ($R^2 > .80$)
 - IQ tests give single result
 - high correlations between IQ and "success"
 - Factor analysis : objective
- Con:
 - "g" has been over-estimated ($R^2 < .40$)
 - IQ tests have multiple subtests
 - IQ measures 3 of 8 Multiple Intelligences
 - Factor analysis : subjective

1043

Psychology 402 - Spring 2015 - Dr. Michael Daele

Factor Analysis

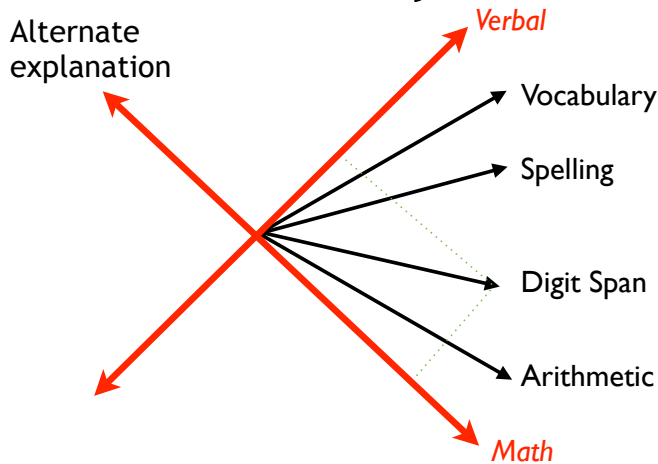

Four Tests, showing high correlations

1044

Psychology 402 - Spring 2015 - Dr. Michael Daele

Factor Analysis

1045

Psychology 402 - Spring 2015 - Dr. Michael Daler

Intelligence : Rank Groups

- Pro:
 - genetic factor within groups is high
 - cross-group factor must be genetic
- Con:
 - logical fallacy
 - height of villagers vs. city dwellers
 - even if group differences are genetic, % variance explained is low
 - can't predict individual behavior

1046

Psychology 402 - Spring 2015 - Dr. Michael Daler

IQ is Genetic / Immutable

- Pro:
 - biological: cross-species genetic differences
 - genetic disorders (e.g. Down's syndrome)
 - test score differences between Whites & Blacks
- Con:
 - Flynn Effect : 30+ points in last 100 years, 15+ in last 50
 - Kendler (2015) - IQ of adopted siblings +/- 12 points based on IQ of adopting parents

1047

Psychology 402 - Spring 2015 - Dr. Michael Daler

Real-world Issues

- IQ & Death Penalty
- Cuts to Childcare Spending
- College Enrollment & SAT scores
- Gender, IQ, and perceived IQ

Killer with Low IQ Executed

By JAMES C. MCKINLEY Jr. Published: December 3, 2009

HOUSTON — Bobby Wayne Woods was executed Thursday evening in Texas after his lawyers lost a battle to persuade the courts that he was too mentally impaired to qualify for capital punishment.

Mr. Woods, 44, was convicted of raping and killing an 11-year-old girl in 1997. He received a lethal injection and was pronounced dead at 6:48 p.m. in the death chamber at a state prison in Huntsville, Tex., after the [United States Supreme Court](#) denied a request from his lawyers to stay his execution. His last words, at 6:40, were: "Bye. I am ready." Tests administered to Mr. Woods over the years placed his I.Q. between 68 and 86, prompting a bitter debate between his lawyers and the state over whether he was too impaired to face execution. The state and federal courts repeatedly sided with prosecutors.

Cuts to Childcare

California child care cuts postponed until Jan. 1

OAKLAND -- Subsidized child care services chopped from the state budget will continue through Dec. 31, according to a legal settlement and court order signed Wednesday in Alameda Superior Court.

About 55,000 children in California, thousands of whom are in the East Bay, originally were slated to lose their child care slots Nov. 1 after Gov. Arnold Schwarzenegger vetoed \$256 million from the state's welfare-to-work program. That date has been postponed three times as the result of a lawsuit filed in October on behalf of Parent Voices Oakland. The advocacy group argued that the California Department of Education failed to give families accurate and timely information about possible alternatives.

The “Asian Invasion”

- In 1922, capped Jewish enrollment at 15% due to “Jewish Invasion”
- In 2014, 50% of applicants with highest SAT scores were Asian, but make up only 20% of admissions
- New lawsuit claims discrimination

The Opinion Pages | OP-ED CONTRIBUTOR

Is Harvard Unfair to Asian-Americans?

By YASCHA MOUNIK NOV 24, 2014

Abbott Lawrence Lowell, 1923.

CAMBRIDGE, Mass. — NEARLY a century ago, Harvard had a big problem: Too many Jews. By 1922, Jews accounted for 21.5 percent of freshmen, up from 7 percent in 1900 and vastly more than at Yale or Princeton. In the Ivy League, only Columbia and the University of Pennsylvania had a greater proportion of Jews.

Harvard's president, A. Lawrence Lowell, warned that the “Jewish invasion” would “ruin the college.” He wanted a cap: 15 percent. When faculty members balked, he stacked the admissions

Psychology 402 - Spring 2015 - Dr. Michael Dohr

Selection Philosophy

- Unqualified Individualism
 - high scores overall are selected
- Quota System
 - high scores within each group are selected
- Qualified Individualism
 - high scores overall are combined with other information to improve differential prediction

Psychology 402 - Spring 2015 - Dr. Michael Dohr

He's Not as Smart...

A British researcher reports that the male ego is often larger than his actual IQ. But you might be surprised by what women think of men's intellect.

By **Joan Raymond** | Newsweek Web Exclusive

Jan 23, 2008 | Updated: 5:25 p.m. ET Jan 23, 2008

Are men smarter than women? No. But they sure think they are. An analysis of some 30 studies by British researcher Adrian Furnham, a professor of psychology at University College London, shows that men and women are fairly equal overall in terms of IQ. But women, it seems, underestimate their own candlepower (and that of women in general), while men overestimate theirs. Furnham talks to NEWSWEEK's Joan Raymond about his findings and why perceived IQ matters...
