51

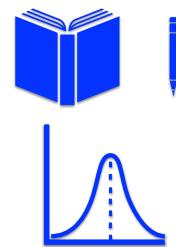

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Why use tests?

Goal: measure Piloting Skills

Test Flight:
Does the pilot crash?

vs.

Paper & Pencil Test:
High Score?

52

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Why use tests?

- Why use tests? vs. the alternative -- just measure the thing directly
 - faster - saves time
 - more convenient, portable, virtual
 - standardize across space & time
 - less dangerous (e.g. brain surgeon)
 - more accurate(?)
 - \$\$\$\$ profit

53

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Arguments against testing

- UnReliable -- inconsistent results
- InValid -- doesn't measure what it claims
- Biased -- treats sub groups differently
- Enforced conformity -- punishes creativity
- People & Institutions adapt -- "study for the test", specialized tutoring
- Expensive -- few large private companies hold most of the business
- Privacy & Security & Cheating

54

Gold, silver, brass & iron

“Citizens, we shall say to them in our tale, you are brothers, yet God has framed you differently. Some of you have the power of command, and in the composition of these he has mingled gold, wherefore also they have the greatest honor; others he has made of silver, to be auxiliaries; others again who are to be husbandmen and craftsmen he has composed of brass and iron; and the species will generally be preserved in the children. But as all are of the same original stock, a golden parent will sometimes have a silver son, or a silver parent a golden son.”

-- Plato, *The Republic*, circa 380 BC

Racial Attitudes of the 1800s

“[...]There is a physical difference between the white and black races which I believe will forever forbid the two races living together on terms of social and political equality. And inasmuch as they cannot so live, while they do remain together there must be the position of superior and inferior, and I as much as any other man am in favor of having the superior position assigned to the white race.”

-- 1858, in a debate with Stephen Douglas

Abraham Lincoln

Species

- Old definition:
 - group of organisms that can breed

 - female donkey + male horse = hinny

83

Psychology 402 - Fall 2022 - Dr. Michael Diehr

2.2 An unsubtle attempt to suggest strong affinity between blacks and gorillas. From Nott and Gliddon, *Types of Mankind*, 1854. Nott and Gliddon comment on this figure: "The palpable analogies and dissimilarities between the Negro and the Gorilla are apparent to all who compare them."
