Psychology 402 - Fall 2022 - Dr. Michael Diehr

1026

Psychology 402 - Fall 2022 - Dr. Michael Diehr

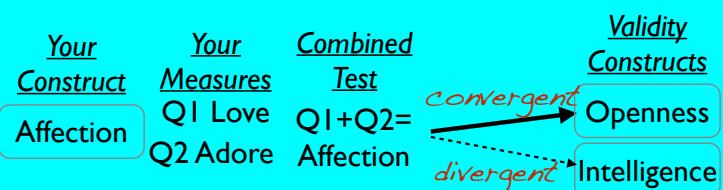

Project Proposal: Getting Help

- Examples on Website
 - APA style guide
 - Construct Example - Depression (see Ch. 13 lecture notes)
 - How to get Annual Reviews PDFs
 - and others...
- Consultation
 - in person
 - Zoom
 - email

1029

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Project Proposal

You create
these

These are already
on the Survey

1031

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Ch. 13: Clinical & Counseling

- Settings / Situations
- Test Types
- Test Designs
 - Deductive
 - Logical Content
 - Theoretical
 - Empirical
 - Criterion Group
 - Factor Analysis
- Example tests

1034

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Clinical and Counseling Settings

- Hospital
 - Inpatient
 - acute
 - long-term
 - Outpatient
- School
 - Counseling (educational)
 - Counseling (psychological)
- Vocational
- Motivational/Performance (Positive Psych)

1035

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Types of Tests

- IQ & Achievement
- Personality
 - structured (“objective”)
 - unstructured (“projective”)
- Clinical
 - Diagnostic
 - Depression, Anxiety, etc.
 - Symptom checklists
- Neuropsychological

1036

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Logical Reasoning

- Deduction
 - premises → conclusion
 - All swans are white
 - Susan is a swan
 - Therefore, Susan is white
- (Empirical) Induction
 - less certain: evidence → probability
 - All of the swans we have seen are white
 - Thus, all swans are probably white

1037

Psychology 402 - Fall 2022 - Dr. Michael Diehr

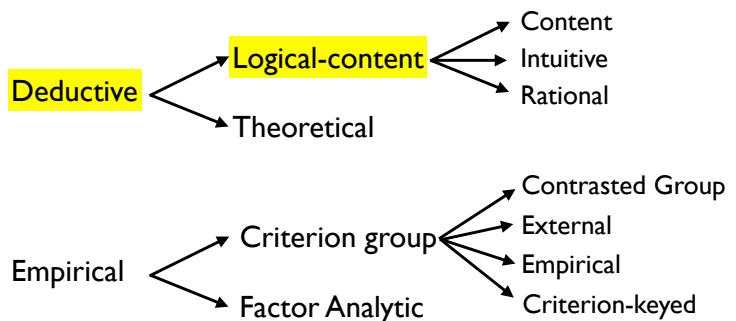

Design Theories

- Deductive (aka “Top Down” or “Theory-driven”)
 - Use reason, clinical experience and common sense to create test questions that are face-valid or content-valid.
- Empirical (aka “Bottom-Up” or “Data-driven”)
 - Look for patterns in large groups of data
 - Data tells us what factors exist
 - Don’t assume face validity

1038

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Design Theories

1039

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Logical-Content

- Deductive
- Logical-Content
 - aka “Content approach”, “Intuitive approach”, “Rational approach”
 - straightforward questions
 - e.g. “did you wet the bed last night?”
 - assumes subjects are honest
 - assumes *face validity*
 - Pro: simple
 - Con: simplistic, naive

1040

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Logical-Content: Woodsworth

- Woodsworth Personal Data Sheet (1920)
- Developed in WWI to identify soldiers who would fail in combat
- 116 Yes/No questions
 - “Do you drink a fifth of whiskey a day?”
 - “Do you frequently daydream?”
 - ...
- All questions are Face valid
 - rarely used today
 - why?

1041

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Logical-Content: Mooney

- Mooney Problem Checklist (1950)
- yes/no to many problem items “I’m having trouble with money”
- All questions face valid
- Sometimes used today
 - Why?

1043

Psychology 402 - Fall 2022 - Dr. Michael Diehr

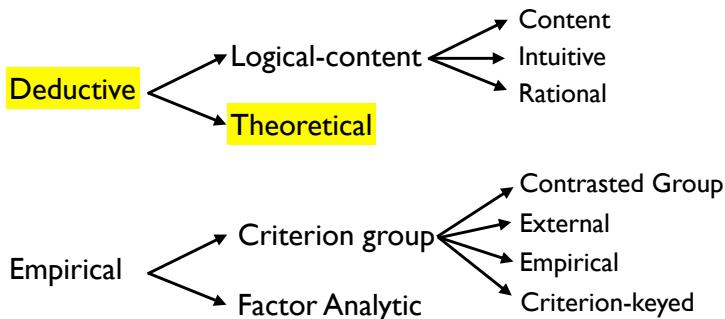

Criticism : Logical-Content

- Major assumptions:
 - Subjects are being honest
 - Items have one objective interpretation
 - e.g. “I never drink too much alcohol”
- Assumptions are flawed
- This design rarely used post 1940

1044

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Design Theories

1045

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Theoretical

- Deductive
 - Theoretical
 - Theory of constructs (dimensions, factors, facets, etc.) used to create test questions.
 - Example (from Freud)
 - Depression =
 - **Anaclitic** (anger at parents)
 - “do you get along with Mom & Dad?”
 - **Introjective** (self loathing)
 - “do you fall short of your goals?”

1046

Psychology 402 - Fall 2022 - Dr. Michael Diehr

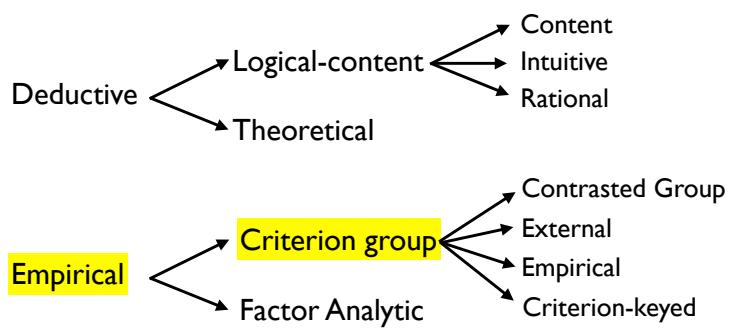

Criticisms of Theoretical Approach

- What evidence that the theory / construct / sub-constructs exist?
- Example:
 - Depression - what theory to use?
 - Psychodynamic?
 - Cognitive?
 - Behavioral?
 - Medical?
 - Social
 - ...

1047

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Design Theories

1049

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Criterion-Group

- Empirical
 - Criterion Group
 - aka “Contrasted Group”, “External strategy”...
 - Give test questions to a group w/disease, disorder or diagnosis (e.g. “Schizophrenics”)
 - Compare (contrast) question scores vs. a “normal” group
 - Questions which distinguish the groups are kept.
 - Cross-validate results with other group(s)

1050

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Criterion-Group Example

Question	Bullies	Non-Bullies
1. It feels good to hurt others	N	N
2. I like watching Boxing	Y	Y
3. I like Hello Kitty	N	Y
4. I am always a good person	Y	Y
5. Other people are weak	Y	N

1051

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Cross-Validation

- Method of giving a more fair, accurate estimate of reliability by essentially “repeating the study” with new subjects
- Use the prediction equations (formulas) on a “fresh” sample
- Guards against “over fitting” data in the first experiment (e.g. Shrinkage)
- If cross-validation groups differ in demographics, increases generalizability.

1052

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Cross-Validation Example

- Researcher #1 does a study in their hospital showing that Schizophrenic patients say “Yes” to the question “I’m afraid of the color blue” at a much higher rate than control subjects.
- This test item can diagnosis Schizophrenia?
- Researcher #2 attempts to cross-validate this study at a different hospital with a different set of patients and controls, and does not find the same effect.
- Why?

1053

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Criterion-Group Tests

- Strong Interest Inventory...
- MMPI...
- CPI...

1054

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Strong Interest Inventory

- Select one occupation (“bartender”)
- Two samples
 - Criterion sample: people who are strongly representative (e.g. happy doing normal bartending tasks)
 - General sample: people from other occupations
- Administer test questions to both groups
- Keep only the questions that discriminate
- [Repeat this process for each different occupation...]

1055

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Criterion-Group Tests

- California Psychological Inventory - 3 (CPI-3)
 - 20 scales
 - focused more on health than illness
 - psychometrics are fair, not great
- Minnesota Multiphasic Personality Inventory
 - Most popular / well researched test
 - Revisions
 - MMPI-2 : 1989; revised norms in 2003; 567 items
 - MMPI-2-RF : 2008 ; shortened to 338 items
 - 10 clinical scales
 - Focused more on psychopathology
 - Good psychometrics

1056

Psychology 402 - Fall 2022 - Dr. Michael Diehr

MMPI Design

- Goal : detect abnormal psychology
- Subjects: Eight criterion groups (psychiatric inpatients) plus normal* control group
- Method: Items which contrasted criterion group with normal group, AND which passed cross-validation at $P < .05$ level were kept.
- Test items were grouped into scales, the scales were named after the criterion group
- Later: additional scales added: Mf and Si

1057

Psychology 402 - Fall 2022 - Dr. Michael Diehr

MMPI-2

- 567 true/false items
- About 2 hours to administer
- Item content looks like face valid statements “I like mechanics magazines”
- Item scoring is not based on face validity
- Each item contributes to one or more Clinical Scales or Content Scales
- Additional Validity Scales attempt to correct for response styles, faking bad or good, etc.
- Scales are normed to T-Scores
 $M (SD) = 50 (10)$

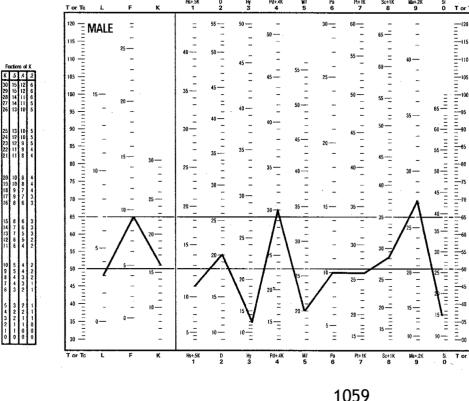

1058

Psychology 402 - Fall 2022 - Dr. Michael Diehr

MMPI-2

Minnesota Multiphasic Personality Inventory-2
 Copyright 1989, 1992, 1993, 1995, 1996 by the UNIVERSITY OF MINNESOTA
 1942, 1943 (revised 1970), 1989 This Profile Form 1085

1059

Psychology 402 - Fall 2022 - Dr. Michael Diehr

MMPI Validity Scales

#	Scale	Name	Interpretation
1	L	Lie scale	naive attempt to fake good
2	F	F scale	“Frequency” scale: attempt to fake bad
3	K	K scale	(sophisticated) defensiveness
4	VRIN	Variable response inconsistency	random responding
5	TRIN	True response inconsistency	“yes” bias

1060

Psychology 402 - Fall 2022 - Dr. Michael Diehr

MMPI Clinical Scales

#	Scale	Name	Interpretation
1	Hs	Hypochondriasis	physical complaints
2	D	Depression	depression
3	Hy	Hysteria	immaturity
4	Pd	Psychopathic Deviate	authority conflict
5	Mf	Masculinity-Femininity	stereotypic m/f interests
6	Pa	Paranoia	suspicion, hostility
7	Pt	Psychasthenia	anxiety
8	Sc	Schizophrenia	alienation, withdrawal
9	Hy	Hypomania	elevated mood & energy
0	Si	Social Introversion	introversion, shyness

1061

Psychology 402 - Fall 2022 - Dr. Michael Diehr

MMPI Psychometrics

- Is the MMPI any good?
 - Reliability...
 - Validity...

1062

Psychology 402 - Fall 2022 - Dr. Michael Diehr

MMPI Reliability

- Reliability is good but not as high as the best tests (such as IQ tests)
- Test-retest correlations $r=0.50$ to 0.90 , mean ~ 0.80
- Scales poorly designed -- some items on multiple scales \rightarrow scales are highly intercorrelated
- Questions poorly designed: (all items on the L scale are keyed False) \rightarrow sensitive to response style
- Scores are correlated to demographics (age, gender, IQ, ethnicity...)

1063

Psychology 402 - Fall 2022 - Dr. Michael Diehr

MMPI Validity

- Thousands of studies investigating MMPI Construct validity
- Used and researched in a very wide range of subjects, settings, disorders.

1064

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Criticism : Criterion-Group

- Major assumptions:
 - People/Patients can be grouped, groups show consistent features and are independent
 - Face validity of response is not important, but responses should be consistent
 - Scales can predict membership in criterion group
- Flaws:
 - Criterion group assumes a lot about patterns of behavior. Neglects possible commonalities across groups.
 - Time-consuming and expensive to create tests

1065

Psychology 402 - Fall 2022 - Dr. Michael Diehr

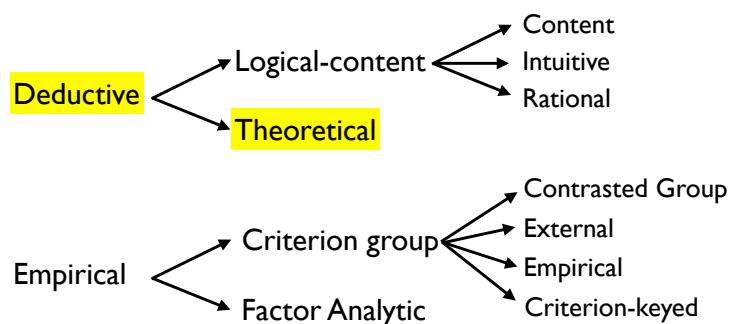

Project Example: Measuring Depression

- Theory
- Measurement
- Reliability / Validity

1066

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Design Theories

1067

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Theory & Construct, Measures

- Theories:
 - Psychodynamic
 - Modern CBT
- Measures
 - BDI-II
 - HAM-D

1068

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Getting a Review Article

- The Hard Way
 - library.csusm.edu
 - search PsycINFO for 'depression'
 - over 200,000 hits
 - choose: methodology = literature review
 - over 9000 hits
- Browse through results
- Ouch!

1069

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Getting a Review Article

- The Easy Way
 - annualreviews.org
 - select Journals / Psychology
 - search for 'Depression / In This Journal'
 - ~600 results
 - more relevance

1070

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Depression : the Construct

- Examples of different theories and ways to define the construct of 'depression'

1071

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Psychodynamic Theory of Depression

- depression = inverted hostility
- Angry at parents, but parents needed for survival
- "anger turned inward"
- "self hatred"

1072

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Psychodynamic Theory of Depression

- Subtypes (Factors):
- *Anaclitic depression* : (perceived) loss of relationships one depends on
 - Facets: helpless, fears of abandonment, separation anxiety
- *Introjective depression* : failure to meet own standards (harsh superego)
 - Facets: worthlessness, guilt, feelings of failure

1073

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Depression-modern theory

- Psychological (Emotional, Cognitive)
- Biological

1074

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Depression-modern theory

- Psychological
 - depressed mood
 - anhedonia
 - poor concentration
 - ruminations (guilt, worthlessness)
 - suicidal ideation
- Cognitive Triad - negative thoughts:
 - about the world
 - about the future
 - about the self

1075

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Depression-modern theory

- Biological:
 - weight change: unintentional loss or gain
 - sleep disturbances
 - psychomotor agitation or retardation
 - loss of energy

1076

Psychology 402 - Fall 2022 - Dr. Michael Diehr

DSM-5 : Major Depressive Episode

- 5 or more for 2 week period (*= required)
- Depressed mood most of most days*
- Anhedonia*
- Significant weight gain or loss (5%/month)
- Insomnia/hypersomnia
- Psychomotor retardation/agitation
- Fatigue/loss of energy
- Worthless/guilty feelings
- Trouble concentrating or indecisiveness
- Suicidal ideation, plans, attempts

1077

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Narrow down Topic

- Review Article
 - Field / Subfield
 - Clinical Psychology / Depression
- Refine / choose specific Construct
 - a sub-topic
 - theory
 - method
- Find an Original Research Article

1078

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Original Research Article

- The hard(er) way:
- PsycINFO
 - search PsycINFO for keywords
 - e.g. “depression” + “stress”
 - 10,000 hits
 - e.g. “depression” + “anaclitic”
 - 150 hits
- *If your construct is narrow, this method may work OK*

1079

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Original Research Article

- From your Review article, find the discussion of your Sub-Topic / Construct. It will have References
 - many references will be Original Research articles
 - find these articles
- Search for a specific measure of your construct.
- Web search for "self-report measure of _____"

1080

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Example: Rumination

- "self report measure of _____"

self report measure of rumination

Q All Images Videos News Maps Shopping Settings

https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2847784
Responses to Positive Affect: A Self-Report Measure of ...
To address this gap, we developed a self-report measure of RPA to parallel the RSQ. We define positive rumination as the tendency to respond to positive affective states with recurrent thoughts about positive self-qualities, positive affective experience, and one's favorable life circumstances.

https://pubmed.ncbi.nlm.nih.gov/20360998
Responses to Positive Affect: A Self-Report Measure of ...
Responses to Positive Affect: A Self-Report Measure of Rumination and Dampening Cognit Ther

Design Theories

1086

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Sample Constructs & Measures

- BDI
- HAM-D (HRSD)

1087

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Beck Depression Inventory

- Aaron T Beck - Psychiatrist (with cognitive focus)
- BDI (1961), BDI-1A (1976)
- BDI-II (1996) - in response to DSM-IV
- 21 item self report
- 0-3 points per item
- Scoring
 - 0-9 minimal depression
 - 10-18 mild depression
 - 19-29 moderate depression
 - 30-63 severe depression

1088

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Roche V 0477	Beck Depression Inventory CRTN: _____ CRF number: _____	Baseline Page 14 patient initis: _____ Date: _____
BDI-II		

Name: _____ Marital Status: _____ Age: _____ Sex: _____
Occupation: _____ Education: _____

Instructions: This questionnaire consists of 21 groups of statements. Please read each group of statements carefully, then pick out the one statement in each group that best describes the way you have been feeling during the past two weeks, including today. Circle the number beside the statement you have picked. If several statements in the group seem to apply equally well, circle the highest number for that group. Be sure that you do not choose more than one statement for any group, including Item 16 (Changes in Sleeping Pattern) or Item 18 (Changes in Appetite).

1. Sadness	6. Punishment Feelings
0 I do not feel sad. 1 I feel sad much of the time. 2 I am sad all the time. 3 I am so sad or unhappy that I can't stand it.	0 I don't feel I am being punished. 1 I feel I may be punished. 2 I expect to be punished. 3 I feel I am being punished.
2. Pessimism	7. Self-Distlike
0 I am not discouraged about my future. 1 I feel more discouraged about my future than I used to be. 2 I do not expect things to work out for me. 3 I feel my future is hopeless and will only get worse.	0 I feel the same about myself as ever. 1 I have lost confidence in myself. 2 I am disappointed in myself. 3 I dislike myself.
8. Self-Criticalness	

Psychology 402 - Fall 2022 - Dr. Michael Diehr

BDI-II Questions

Sadness	Self-Criticalness	Loss of Energy
Pessimism	Suicidal Thoughts	Sleep Changes
Past Failure	Crying	Irritability
Loss of Pleasure	Agitation	Appetite
Guilty Feelings	Loss of Interest	Concentration
Punishment Feelings	Indecisiveness	Fatigue
Self-Dislike	Worthlessness	Interest in Sex

1090

Psychology 402 - Fall 2022 - Dr. Michael Diehr

BDI-II Psychometrics

- Test-retest: $r = 0.93$
- Cronbach's Alpha = 0.91
- Correlation with HAM-D : $r = 0.71$

1091

Psychology 402 - Fall 2022 - Dr. Michael Diehr

HAM-D aka HRSD

- Hamilton Rating Scale for Depression
- Max Hamilton - Psychiatrist 1912-1988
- 17 item clinician rating
- 0-7 rating for each question
- Scoring:
 - 0-7 : normal
 - 8-13 : Mild
 - 14-18 : Moderate
 - 19-22 : Severe
 - 23+ : Very Severe

1092

Psychology 402 - Fall 2022 - Dr. Michael Diehr

HAM-D

Hamilton Depression Rating Scale (HDRS)

PLEASE COMPLETE THE SCALE BASED ON A STRUCTURED INTERVIEW

Instructions: for each item select the one "cue" which best characterizes the patient. Be sure to record the answers in the appropriate spaces (positions 0 through 4).

1 DEPRESSED MOOD (sadness, hopeless, helpless, worthless)	2 FEELINGS OF GUILT
0 <input type="checkbox"/> Absent.	0 <input type="checkbox"/> Absent.
1 <input type="checkbox"/> These feeling states indicated only on questioning.	1 <input type="checkbox"/> Self reproach, feels he/she has let people down.
2 <input type="checkbox"/> These feeling states spontaneously reported verbally.	2 <input type="checkbox"/> Ideas of guilt or rumination over past errors or sinful deeds.
3 <input type="checkbox"/> Communicates feeling states non-verbally, i.e. through facial expression, posture, voice and tendency to weep.	3 <input type="checkbox"/> Present illness is a punishment. Delusions of guilt.
4 <input type="checkbox"/> Patient reports virtually only these feeling states in his/her spontaneous verbal and non-verbal communication.	4 <input type="checkbox"/> Hears accusatory or denunciatory voices and/or experiences threatening visual hallucinations.

28

1093

Psychology 402 - Fall 2022 - Dr. Michael Diehr

HAM-D Questions

Depressed Mood	Retardation	Hypochondriasis
Feelings of Guilt	Agitation	Weight Loss
Suicide	Anxiety: Psychic	Insight
Insomnia: Early	Anxiety: Somatic	
Insomnia: Middle	Appetite	
Insomnia: Late	General Somatic Sx	
Work/Activities	Genital Symptoms	

1094

Psychology 402 - Fall 2022 - Dr. Michael Diehr

HAM-D Psychometrics

- Often considered the “Gold Standard”
- Criticized for not being “Gold Standard”
- Bagby, Ryder et al (2004)
 - Pros:
 - test-retest: $r = 0.81$ to 0.98
 - Cronbach's alpha: $r = 0.48$ to 0.92
 - inter-rater: $r = 0.65$ to 0.98

1095

Psychology 402 - Fall 2022 - Dr. Michael Diehr

HAM-D Psychometrics

- Cons:
 - poor item characteristics
 - “Most of the items still measure multiple constructs, items that have consistently been shown to be ineffective have been retained, and the scoring system still includes differential weighting of items...”

1096

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Factors?

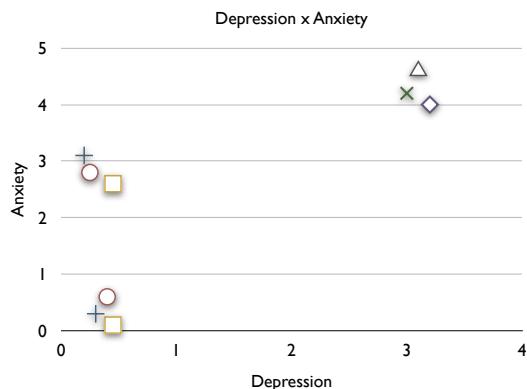

- What if you don't know what the factors are?

1097

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Empirical Analysis

Multivariate data often appears to form natural groups

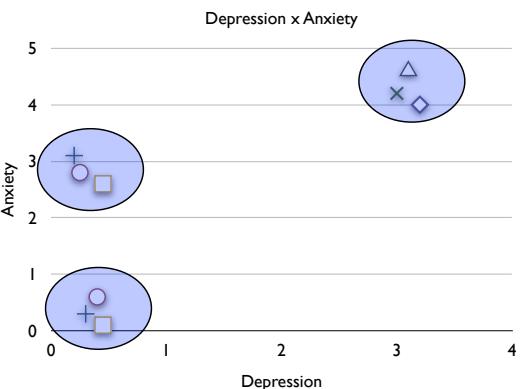

1098

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Empirical Analysis

“Natural” groupings in data are determined statistically

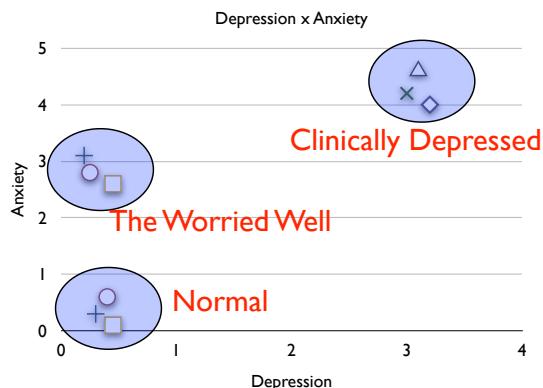

1099

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Empirical Analysis

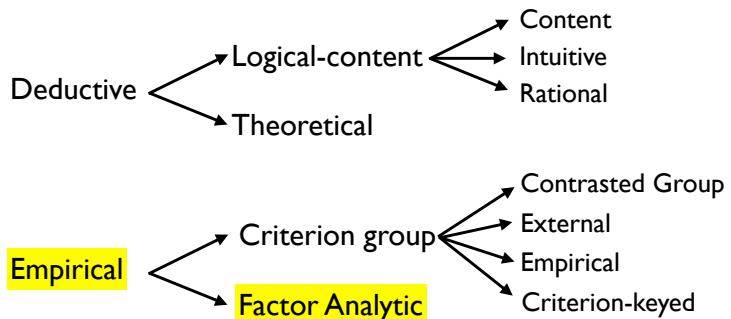

Groups are then named using logical/content analysis

1100

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Review : Design Theories

1101

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Factor-Analytic

- Empirical
- Factor-Analytic
 - Ignore face-validity, content-validity or criterion-group
 - Look for natural patterns in the data
 - Assume patterns are meaningful (not random)
 - Reduce redundant variables or questions
 - Examine the content, name the factors

1102

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Factor Analysis

- Patterns within correlation matrix
- Compute *Factors* which account for maximum variance
- Factors: How many? Naming them?

Correlation Matrix

Measure	Factor 1	Factor 2
Love	0.75	0.17
Like	0.87	0.05
IQ	-0.02	0.65
GPA	0.10	0.91

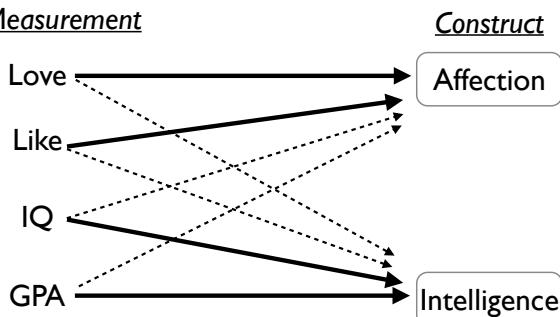

1104

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Validity & Factor Analysis

- Convergent Validity : strong correlation
- Divergent Validity: weak correlation

Measurement

1105

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Factor Analytic Tests

- 16PF...
- Big 5...
- NEO...

1106

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Factor-Analytic : 16PF

- Cattell's 16 Personality Factor Questionnaire (16PF)
- 4504 traits chosen from dictionary, reduced to 171 traits.
- 171 questions given to college students
- Factor Analysis: 16 distinct factors (with 4-5 higher factors)
- Norms for age, gender, reading level, etc.
- Test versions available for adolescents and children

1107

Psychology 402 - Fall 2022 - Dr. Michael Diehr

16PF Factors

Scale	Name	Low	High
A	Warmth	cool, reserved	warm, outgoing
B	Reasoning	concrete, dull	abstract, bright
C	Emotional Stability	affected by feelings	emotionally stable
E	Dominance	submissive, humble	dominant, assertive
F	Liveliness	sober, restrained	enthusiastic, spontaneous
G	Rule-Consciousness	expedient, indulgent	conscientious, conforming
H	Social Boldness	shy, timid	bold, venturesome
I	Sensitivity	tough-minded	tender-minded, sensitive
L	Vigilance	trusting, easy going	suspicious, skeptical
M	Abstractedness	practical, down to earth	imaginative, absent-minded
N	Privateness	forthright, genuine	shrewd, calculating
O	Apprehension	self-assured, secure	apprehensive, insecure
Q1	Openness to Change	conservative, traditional	experimenting, liberal
Q2	Self-Reliance	group-oriented, joiner	self-sufficient, resourceful
Q3	Perfectionism	undisciplined, lax	controlled, compulsive
Q4	Tension	relaxed, tranquil	tense, frustrated

1108

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Criticism : Factor-Analytic

- Major assumptions:
 - Data patterns (factors) are stable
 - Factors can be named from question content
- Flaws:
 - Factor analysis allows multiple solutions
 - # of factors is arbitrary (16 or 5 or 4?)
 - Naming factors : face-valid examination of data

1109

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Factor-Analysis

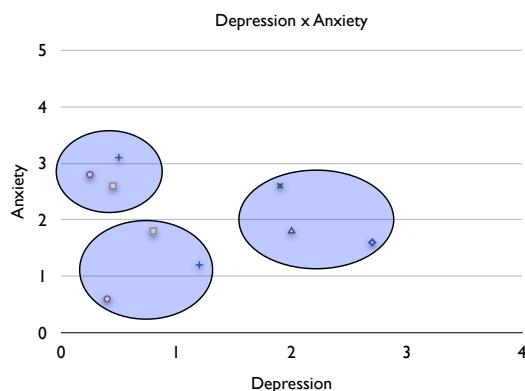

- MMPI-2 has 10 scales
- Factor analysis of MMPI-2 suggests only 2 major factors:
 - “positive affectivity”
 - “negative affectivity”
- How many factors are there really?

1110

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Factor Analysis

of groups, and group boundaries can be arbitrary

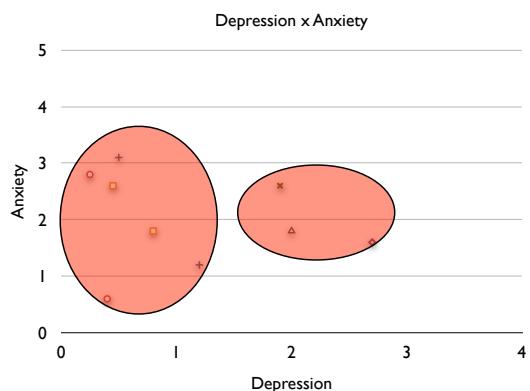

1111

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Factor Analysis

3 groups?
Or only two?

1112

Psychology 402 - Fall 2022 - Dr. Michael Diehr

The “Big 5”

- Many researchers find 3 to 5 personality factors a good balance
- The 16PF factors reduce to 4 (or 5) bigger factors

1114

Psychology 402 - Fall 2022 - Dr. Michael Diehr

Big 5 Personality Factors

Scale	Description
N	Neuroticism
E	Extraversion
O	Openness to experience
A	Agreeableness
C	Conscientiousness

1115

Psychology 402 - Fall 2022 - Dr. Michael Diehr

NEO Personality Inventory

- MMPI : psychopathology in abnormal subjects
- NEO: “positive psychology” - health & style in normal subjects
- Versions
 - NEO : 3 factors (N,E,O)
 - NEO-PI: 5 factors (N,E,O, A,C)
 - NEO-PI-R
 - NEO-FFI (60-item version of NEO-PI-R)
 - NEO-PI-3
 - NEO-FFI-3 <-- the version you took in class
 - The NEO Five-Factor Inventory-3: Four-Factor Version (NEO-FFI-3:4FV)

1116

Psychology 402 - Fall 2022 - Dr. Michael Diehr

NEO Facets

Scale	Description	Facets						
N	Neuroticism	anxiety	hostility	depression	self-consciousness	impulsive-ness	vulnerability to stress	
E	Extraversion	warmth	gregariousness	assertiveness	activity	excitement-seeking	positive emotion	
O	Openness to experience	fantasy	aesthetics	feelings	actions	ideas	values	
A	Agreeable-ness	trust	straight-forwardness	altruism	compliance	modesty	tender-mindedness	
C	Conscientiousness	competence	order	dutifulness	achievement striving	self-discipline	deliberation
