Neuropsychology

- Definitions
- History
- Goals
- Methods
- State of the art
- Issues
- Demographic Norms
- Careers / Training

1385

Psychology 402 - Spring 2022 - Dr. Michael Diehr

Clinical Neuropsychology

- Field: Subfield of clinical psychology
- Setting: outpatient and inpatient
- Subjects/Patients: children, adolescents, adults, geriatric
- Methods: Measure function of specific brain areas & systems.
- Measures: Standard tests (IQ tests) as well as specialized test batteries
- Norms: standard, as well as specialized, normative data

1386

Psychology 402 - Spring 2022 - Dr. Michael Diehr

Goals of NP Assessment

- Diagnosis
 - Clinical
 - Scientific
 - Medico-legal / forensic
- Understanding of neurological basis of disorder
- Prognosis
- Treatment plan
 - surgical, pharmacological, psychosocial, remediation
- Track changes over time

1387

Psychology 402 - Spring 2022 - Dr. Michael Diehr

Neurology v. Neuropsychology

	Neurology	Neuropsychology
Education	MD	PhD
Methods	hands on, informal	hands off, structured
Decisions	clinical judgement	statistics & norms
Focus	motor / sensory	cognitive
Psychosocial	some	much
Treatments	drugs, surgery	rehabilitation, compensation

1388

Psychology 402 - Spring 2022 - Dr. Michael Diehr

Behavioral tests vs. biological

- Q: What has better reliability/validity to diagnose brain disease? brain imaging vs. neuropsychological tests?
- A: Often, most sensitive test of early dysfunction is a NP test
- Example: Alzheimer's disease shows a very specific pattern of "rapid forgetting" that can be detected by memory testing, long before it shows up on brain imaging scans.
- NP testing is relatively non-invasive, though not particularly inexpensive

1389

Psychology 402 - Spring 2022 - Dr. Michael Dohr

Behavioral tests vs. biological 2

- Behaviors are mediated by multiple brain systems located throughout the brain.
- Not easily imaged with MRI
- Behavior is what matters. Testing behavior directly can be more accurate.
- Why not both? Imaging shows the damage, NP tests show the effects.

1390

Psychology 402 - Spring 2022 - Dr. Michael Dohr

Assessment

- Psychological Test
 - administration
 - results
 - interpretation
- Test Battery
 - multiple tests
- Other sources of data
 - Clinical Interview
 - History
 - other records...

1391

Psychology 402 - Spring 2022 - Dr. Michael Dohr

Neuropsych. Batteries

- Fixed Battery
 - Give all patients same set of tests
 - Increase chance of finding subtle/hidden impairments
 - Excellent statistics and normative data
- Flexible Battery
 - Tailor specific tests to specific patients
 - More like neurology, more hands on
 - Poor statistics, possible to miss hidden issues

1392

Psychology 402 - Spring 2022 - Dr. Michael Dohr

Fixed Batteries

- Halstead-Reitan
 - WAIS-IV plus additional tests of memory, learning, motor and sensory skills
 - Approx 6 hours to administer
- Luria-Nebraska
 - Luria had a flexible battery based on theory of pluripotentiality (multiple brain systems could compensate to do the same tasks)
 - Test battery improved and standardized at U. Nebraska
 - Approx 24 hours(!) to administer

1393

Psychology 402 - Spring 2022 - Dr. Michael Dohr

Halstead-Reitan Battery

- Full WAIS IQ Test
- Additional tests:
 - Category test
 - Grooved pegboard
 - Rhythm
 - Speech comprehension
 - Finger tapping
 - Trail making
 - Grip Strength
 - Sensory-perceptual exam
 - ...

1394

Psychology 402 - Spring 2022 - Dr. Michael Dohr

Gardner's 8 Intelligences

- logical-mathematical (*)
- verbal-linguistic (*)
- spatial (*)
- musical
- bodily-kinesthetic
- naturalist
- interpersonal
- intrapersonal

1400

Psychology 402 - Spring 2022 - Dr. Michael Diehr

Limitations of NP Testing

- Most tests predate modern neuroscience
- Lack of pre-test data
 - reliance on normative data
- Lack of international standardization
- Lengthy
 - 2 - 20 hours of testing
- Expensive
- Requires Ph.D. level training

1401

Psychology 402 - Spring 2022 - Dr. Michael Diehr

Demographic Corrections

1402

- Normative Data would be simple if there was one definition of "normal"
- Simple model

Psychology 402 - Spring 2022 - Dr. Michael Diehr

Demographic Model

1403

Psychology 402 - Spring 2022 - Dr. Michael Diehr

Common Demographic Covariates

1405

- Race/Ethnicity
- Sex
- Age
- Education
- Language

THE PACED AUDITORY SERIAL ADDITION TASK (PASAT): NORMS FOR AGE, EDUCATION, AND ETHNICITY

Michael C. Diehr
San Diego State University
University of California, San Diego
Joint Doctoral Program in Clinical Psychology

Robert K. Heaton
Walden Miller
Igor Grant
University of California, San Diego
and the HIV Neurobehavioral Research Center

Psychology 402 - Spring 2022 - Dr. Michael Diehr

Diehr et al. (1998) Results

1411

- Statistically and Clinically-significant differences in PASAT test result found for
 - Age
 - Education
 - Ethnicity
- Results not statistically or clinically significant:
 - Gender

Psychology 402 - Spring 2022 - Dr. Michael Diehr

PASAT by age & ethnicity

1412

Psychology 402 - Spring 2022 - Dr. Michael Diehr

Age - after age 35...

1414

- Worsens significantly
 - fluid reasoning
 - speed of processing
 - working memory
 - long term memory
- Holds / drops a little
 - Crystallized information
 - semantic memory
- May get better?
 - reasoning
 - vocabulary
 - emotion
 - metacognition

Psychology 402 - Spring 2022 - Dr. Michael Diehr

CANTAB Paired Associate Learning

1416

Paired Associate Learning (errors)– Computerized Task (n=1444)

Psychology 402 - Spring 2022 - Dr. Michael Diehr

Sociocultural Events in Neuropsychology

- Sports Concussions
- Marijuana Legalization

1417

Sports Concussions

NFL CONCUSSION SETTLEMENT

IN RE: NATIONAL FOOTBALL LEAGUE PLAYERS' CONCUSSION INJURY LITIGATION
No. 2:12-md-02323 (E.D. PENN.)

HOME | NOTICE MATERIALS | COURT DOCUMENTS | FAQs | SIGN UP FOR FUTURE INFORMATION

Welcome to the NFL Concussion Settlement Program Website

A Settlement of a class action lawsuit was reached with the NFL and NFL Properties and retired NFL players, their representatives and family members. The retired NFL players sued, accusing the NFL of not warning players and hiding the damages of brain injury. On July 7, 2014 the Court granted preliminary approval of this Settlement.

Retired players, legal representatives of incapacitated or deceased players, and families of deceased players may be eligible to receive benefits from this Settlement.

The proposed settlement provides for three benefits:

1. Baseline medical exams for retired NFL players;
2. Monetary awards for diagnoses of ALS (Lou Gehrig's disease), Alzheimer's Disease, Parkinson's Disease, Dementia and certain cases of chronic traumatic encephalopathy or CTE (a neuropathological finding) diagnosed after death; and
3. Education programs and initiatives related to football safety.

[🏠](#) > [Current Issue](#) > [vol. 109 no. 40](#) > [Madeline H. Meier, E2657–E2664, doi: 10.1073/pnas.1206820109](#)

Persistent cannabis users show neuropsychological decline from childhood to midlife

1419

Psychology 402 - Spring 2022 - Dr. Michael Dohr

Careers in clinical neuropsychology

- Subfield of Clinical Psychology
- Ph.D. (or Psy.D.) with about 2000 hours clinical training
- Internship : 1 year (2000 hours)
- Post-doc : 1+ year (2000+ hours clinical training)
- Employment -- hospital or clinic, sometimes forensic (legal), often joint with Univ.
- Pay -- good, often better than typical clinical psychologist, not as good as MD.
