## Midterm 2 Study Guide (page 2 of 2)

- Preparation
  - Given a Raw score (mean & SD), know the formula to convert to Z, T, or Scaled score.
  - Given a specific cognitive task, reason about the component cognitive processes involved in performing the task. Is it mediated more by Left or Right hemisphere? Is it more related to General Ability or Cognitive Proficiency? What effects of demographic variables (age, education, gender) should we expect?
